The dynamics that define new and ever more agile workspace layouts find the main driver in technology. Today we are using increasingly portable and advanced gadgets, where access to corporate information is through the cloud. In this sense, the products that furnish the spaces must follow this trend and provide the necessary resources, such as charging docks.

Nesse sentido, os produtos que equipam os espaços devem acompanhar esta tendência e providenciar os recursos necessários como, por exemplo, pontos de carregamento.

# ACOUSTIC

ACÚSTICO - ACÚSTICO - ACOUSTIQUE

Workspaces have become more dynamic and collaborative in order to adapt to new needs. Although communication flows in a more natural way, noise becomes an unwanted factor, for this acoustic solutions are needed that through their shape and material composition are able to absorb these impacts.

Apesar da comunicação fluir de forma mais natural o ruído torna-se um fator indesejado, para isso são necessárias soluções acústicas que através da sua forma e composição material sejam capazes de absorver estes impactos.
